

PLAINSCRAFT

HANDMADE

IN THE USA

A WILDER KIND OF

EXPERIENCE

LET'S BUILD SOMETHING TOGETHER

When you first step foot in a PlainsCraft Covered Wagon, there's something you feel immediately: a sense of awe. And there's a reason for that. They're built to be unforgettable. And most importantly, they're built to help your business grow.

Handmade in the USA (right in the heart of Kansas), our company creates beautiful, full-sized, fully-outfitted covered wagons for outdoor hospitality providers, adventure travel destinations, campsites, agro-tainment venues, and pretty much anyone who seeks to offer a one-of-a-kind overnight experience visitors will never forget.

THERE ARE THREE THINGS A PLAINSCRAFT WAGON WILL DO FOR YOUR BUSINESS

CREATE AN UNFORGETTABLE ATTRACTION

How many wagons do you currently have at your location? If the answer is none, then it will stand out to your customers and appeal to their sense of adventure. These wagons attract a greater number of customers thanks to the unique historical experience they offer. Place multiple wagons in a circle with a fire pit in the center to create a true old west feel. Your customers might just feel like pioneers themselves once their stay is over!

ENHANCE YOUR CUSTOMERS' EXPERIENCE

Glamping in an 1800s style wagon creates intrigue and makes your customers' stay unforgettable. And while they offer an old time feel, they provide all of the modern conveniences they need to make their stay truly comfortable.

GROW YOUR PROFITABILITY

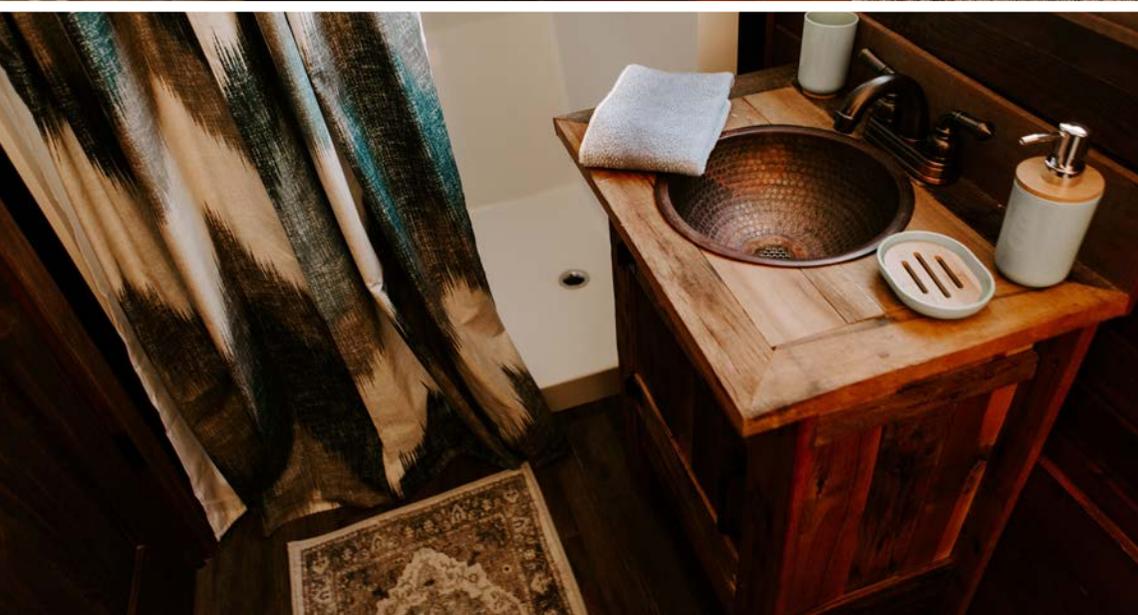

Recent statistics show glamping structures rent quickly, making it a sensible investment that virtually pays for itself within its first year in operation. Plus, our wagons are classified as equipment, which means it qualifies for an immediate tax write off. Curious to see how the wagons will pay off? Let's chat about how easy it is for your investment to start paying off.

Glamping is expected to grow globally from \$2.1 billion in 2018 to \$4.8 billion by 2025.

GET A TASTE OF THE UNEXPECTED

PlainsCraft is a family-owned business and we take personal pride in every one of the wagons we build here on the site. Each wagon is handcrafted with meticulous care, and we monitor every detail that goes into the construction process. We want our clients to feel the same pride that we feel! And we want our wagons to help them build revenue for years, decades, even generations to come.

We start with the foundation. Our beautiful traditional wheels are made by Amish wheelwrights using the highest quality hardwood. The large wooden wheel hubs house heavy-duty steel boxing and roller bearings. Once they're built and fitted with extra heavy steel tires they are ready to mount.

The body of each wagon is constructed by hand using high quality lumber which we treat with three coats of preservative stain. This first two coats are applied before assembly using an automated conveyerized process to ensure complete coverage and total protection from moisture and UV light. The third coat is applied after assembly. Our wagons are designed to withstand harsh outdoor conditions with minimal maintenance.

Then it's time for the canvas covering, a part of the wagon on which we'll never compromise. What's a covered wagon without a beautiful, lasting, weatherproof canvas cover? Our covers are made from the very highest quality 12-ounce treated canvas available, preshrunk and protected from rot, moisture and UV damage. With a minimal amount of attention, our canvas covers will provide years of trouble-free service.

STANDARD FEATURES
